

LaCie DVD±RW Internal Drive with LightScribe

E-IDE, with Double Layer, 16x

LightScribe Direct to Disc Labeling

● CUSTOM DVDs IN MINUTES

Offering the fastest DVD record speed on the market the LaCie DVD±RW Internal Drive features a 16x record speed. Import video and audio footage from your DV camcorder and burn projects onto DVD or CD-Video discs. Completed DVDs can then be played back on virtually any DVD player.

● LIGHTSCRIBE DISC LABELING

LightScribe is an innovative new technology that allows you to burn silkscreen-quality labels directly onto CDs/DVDs*** with a laser instead of a printer. LightScribe uses a combination of your CD or DVD drive, specially coated discs, and enhanced disc-burning software to produce precise, professional labels. The result is an impressive iridescent image composed of art, text, or photos of your own creation. For more information about LightScribe please visit www.lacie.com/lightscribe.

● DUAL DVD±RW IN ONE DRIVE

This universal drive delivers six DVD formats in a single device. By combining DVD+RW and DVD-RW formats, the LaCie DVD±RW Internal Drive delivers greater creative versatility by eliminating the need to choose one format over another. This dual-purpose drive is also capable of writing to CD and DVD formats, which are compatible with nearly all existing DVD-Video players.

● STORE MP3s, PHOTOS & VIDEO

Back up valuable data, share photos, and archive MP3 libraries and MPEG-2 DVD video all on one disc. With the ability to store digital data on CD or DVD media, this drive allows you to burn up to 8.5GB* or more than two hours of theater-quality video on large-capacity DVD discs. The included software - Easy Media Creator 7 or Toast Lite - will help you easily record professional quality, personalized DVDs.

- Double layer recording technology
- Create custom labels for your discs
- Expansive 8.5GB digital storage capacity*
- Multi-format DVD rewritable drive with software

FEATURES

- DVD±RW and CD-RW in one drive
